HURRICANE[®] METAL SHAKE

The TEK[®] Industries team has put together a product and strategy that brings you a beautifully crafted, high TEK Roofing solution: The **HURRICANE[®] Metal Shake**. With the highest wind rating available, equipped with foam insulation inserts and built-in radiant barrier, HURRICANE[®] Metal Shake passed the ASTM E1592 test at CAT5 wind speeds, and it can withstand up to 2" hail.

Our proprietary manufacturing process makes our metal shakes exceptionally strong and beautiful.

- CLEAR ACRYLIC OVERGLAZE**
Increases brightness and bonding strength, while preventing water penetration to sublayers and granular structure.
- NATURAL STONE CHIPS**
With natural UV protection, the stone layer is what gives the metal shake its beauty and color, while also reducing noise from rain or hail.
- BASECOAT**
Bonds the stone layer to the steel base and provides added protection to the sublayers.
- ACRYLIC RESIN PROTECTIVE COATING**
Protects the aluminum zinc layer while enhancing color adhesion and vibrancy.
- ALUMINUM ZINC**
With heat-reflective properties and strong corrosion resistance, this layer provides exceptional energy efficiency as well as added durability.
- STEEL BASE**
High-strength steel provides the foundation for the most durable and beautiful roofing product on the market.
- ALUMINUM ZINC**
The steel base is sandwiched in between two aluminum zinc layers and bonded together. This layer reflects heat for energy efficiency and provides added durability and protection.
- ACRYLIC RESIN PROTECTIVE COATING**
Protects the aluminum zinc layer while enhancing color adhesion and vibrancy.
- FOAM INSULATION (PATENT 11,230,842)**
Our exclusive foam layer was developed to provide both structural support and exceptional insulating properties.

HURRICANE [®] METAL SHAKE	
Minimum roof pitch	3:12
Panel size	52-1/2" X 16-1/2"
Installed exposure	50-3/4" X 14-1/2"
Panels per square	20
Installed Weight	145.5 lbs/sq

CERTIFICATIONS

Texas Department of Insurance
UL 2218 Class IV
ASTM E1592

Other Specs
ASTM A792
ASTM B117
ASTM G155
ASTM E108

“ I’ve had people call and comment on how much better my home looks, and it certainly is pleasing to the members of our homeowners association.
— Tracey, South Texas Homeowner ”

HURRICANE® Metal Shake Pro is the perfect solution for severe weather regions. With its additional fasteners per panel, higher corrosion-resistant coating, and 2-pound density foam insert, HURRICANE® Metal Shake Pro passed with the highest rating for both uplift and impact testing.

The original Hurricane Metal Shake with added **Interlocking Technology.**

“ We know that this is the last roof we’ll ever have to put on this home. Our insurance rates have come down. Our prestige within the neighborhood has finally gone back up. We are completely satisfied, and I know that anybody else that puts this roof on will be completely satisfied as well. — Anne, Haslett, TX ”
